Introduction to Supply Chain Types

Direct Supply Chain

A simple model where goods move directly from the manufacturer to the customer.

Indirect Supply Chain

Involves intermediaries like distributors or wholesalers between the manufacturer and the customer.

Multi-Tier Supply Chain

A complex structure with multiple layers of suppliers and distributors involved in the process.

Agile Supply Chain

Focuses on flexibility and responsiveness to meet rapidly changing market demands.

Characteristics of Different Supply Chains

Type	Key Features	Examples
Direct	Short lead times, high control	Custom-made products, small-scale businesses
Indirect	Wider reach, lower costs per unit	Mass-produced consumer goods, retail chains
Multi-Tier	High complexity, global reach	Electronics, automotive industry
Agile	Fast adaptation, high flexibility	Fashion, technology startups
