# Cyber Stalking

In **Cyber Stalking**, a cyber criminal uses the internet to threaten somebody consistently. This crime is often done through email, social media, and other online mediums.

Cyberstalking is the use of the internet or digital tools to repeatedly harass, threaten, or stalk someone. It includes sending unwanted messages, hacking accounts, or spreading lies online

# Examples of Cyberstalking

**Repeated Unwanted Messages**

**False Profiles**

**Tracking Online Activity**

**Hacking Accounts**

**Posting Private Information**

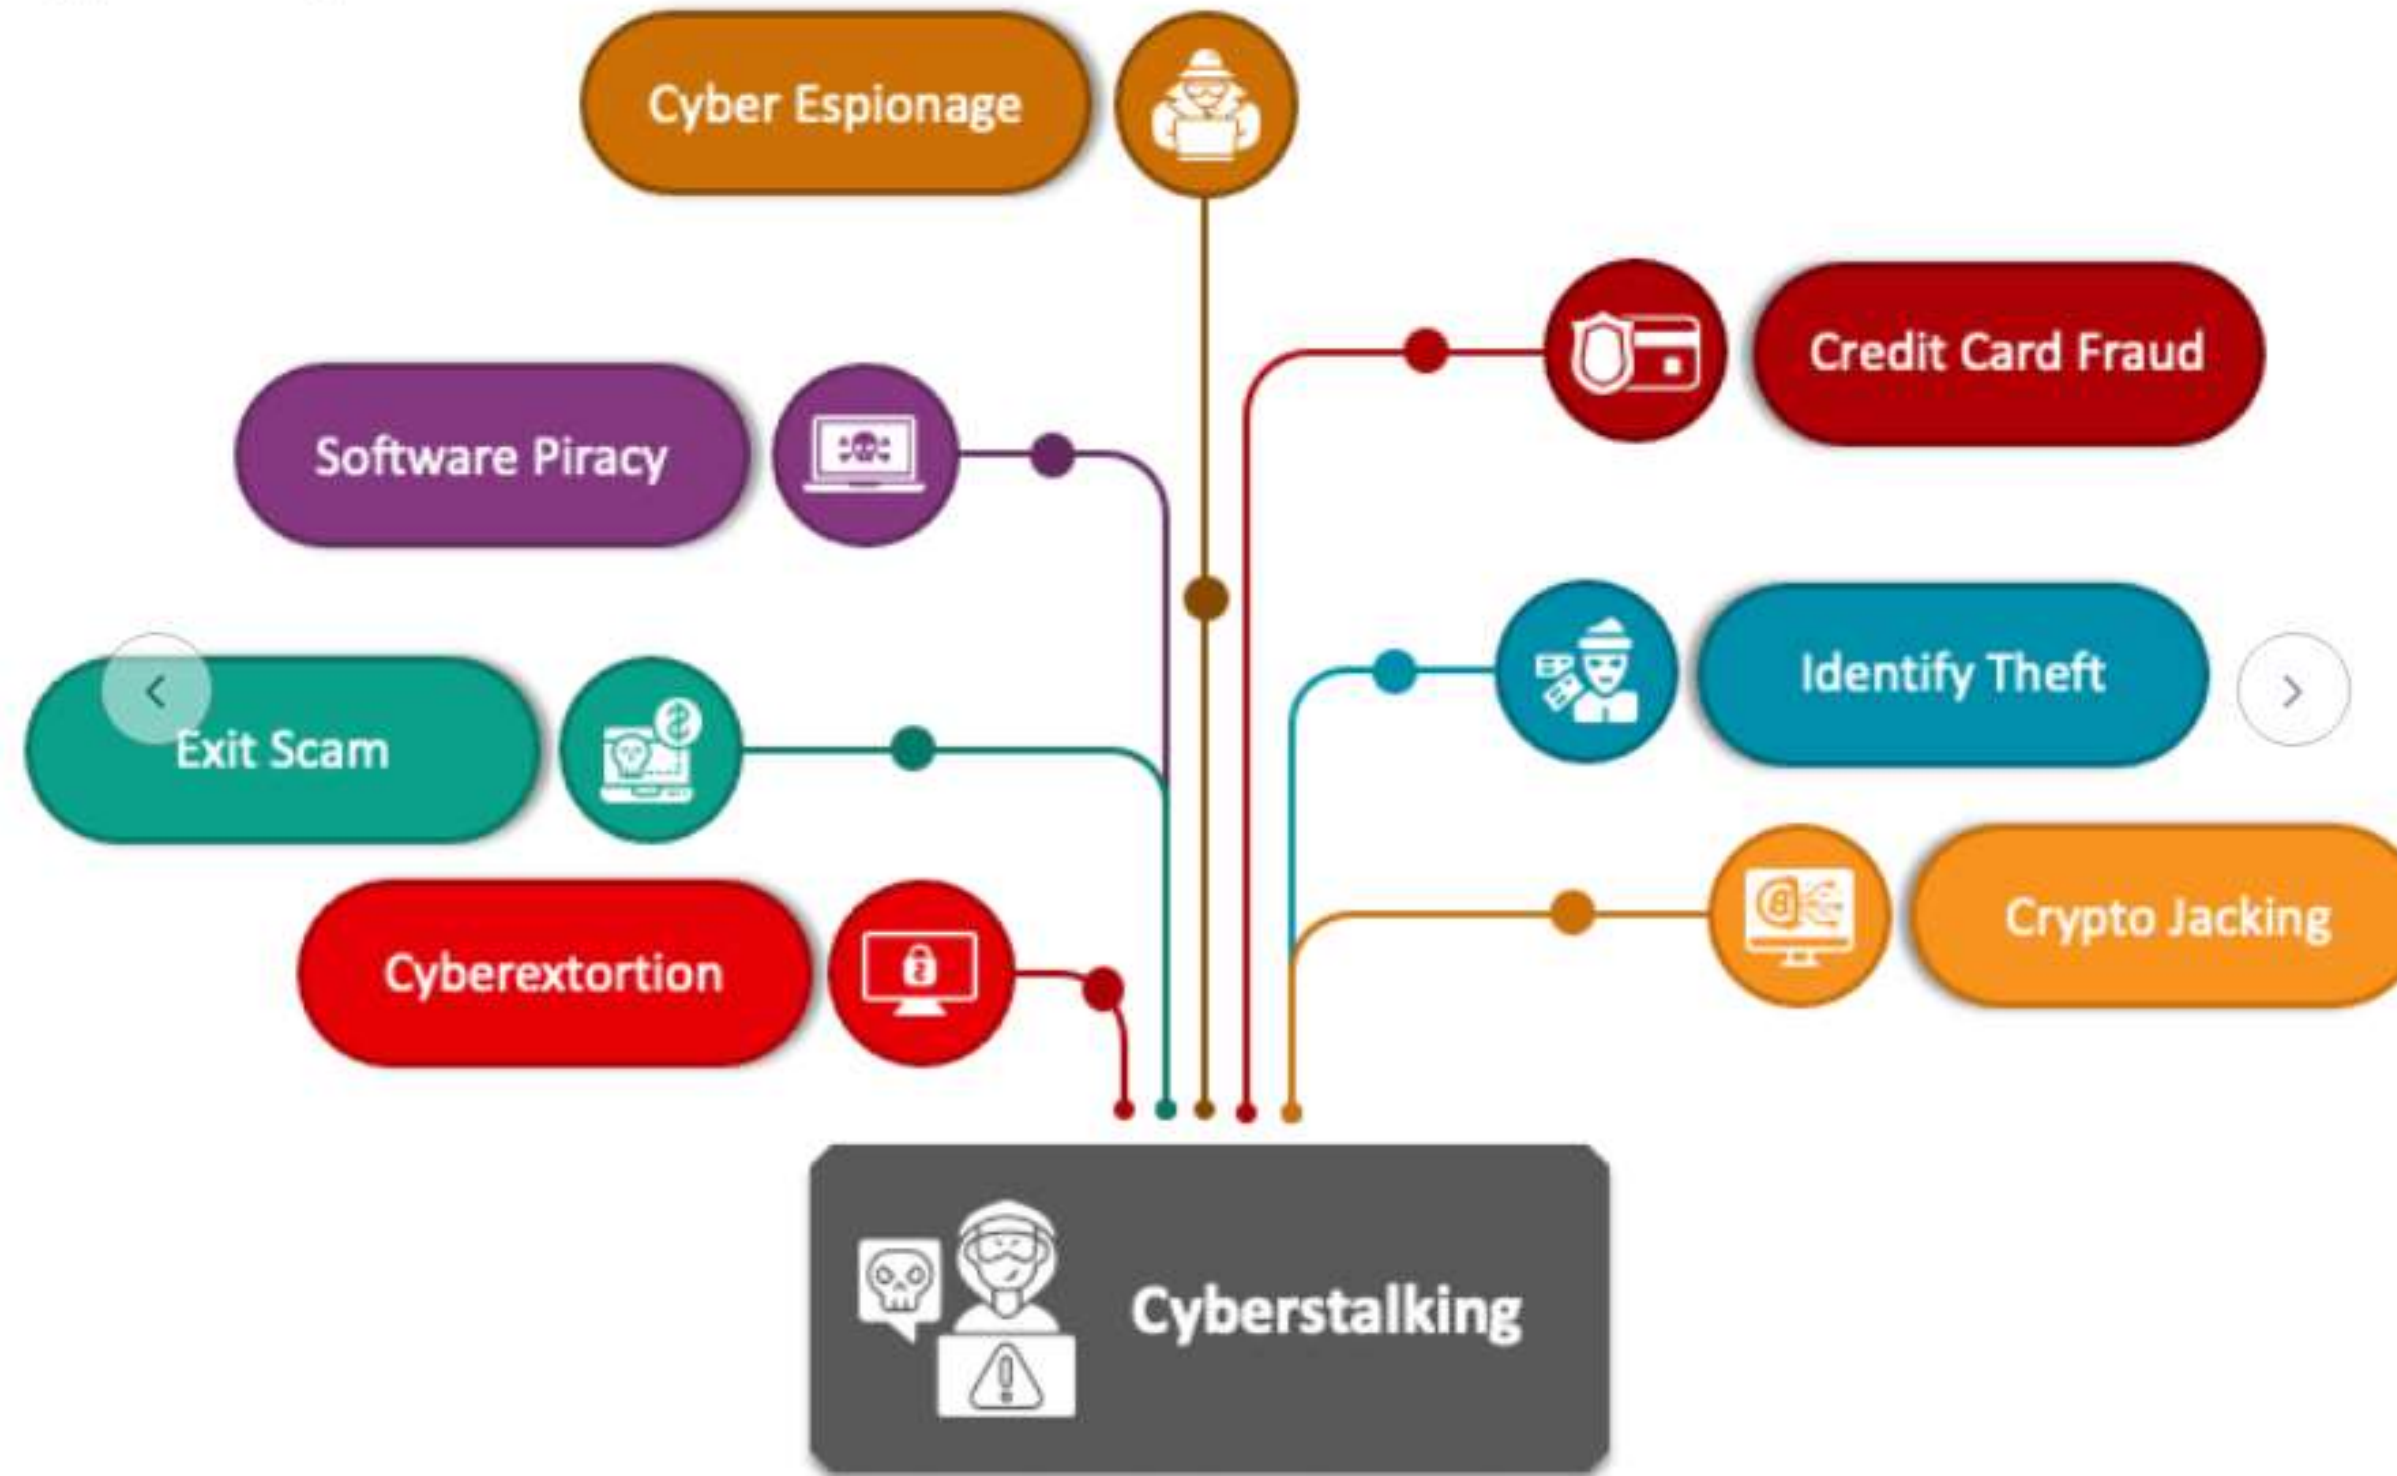

**Threatening Comments**

**Monitoring via GPS or Spyware**

**UCI CARE**  
949.824.7273 | care.uci.edu

According to the Stalking Resource Center of the National Center for Victims of Crime, 7.5 million people are stalked each year in the United States. In recognition of Stalking Awareness Month, UCI CARE will be holding several programs to raise awareness and educate the campus community about the warning signs and available resources related to stalking. Follow CARE on Facebook and Instagram to learn about tips, resources, and statistics on stalking and cyberstalking throughout the month of January. Share resources and statistics from your social media accounts, using #UCIStalkingAwareness.

**1 in 4**

Female identified persons aged 18-24 have been stalked online.

Almost 1.5 million people in the United States alone suffer from cyberstalking at least once every single year.

**1 in 12**

1 out of every 12 American female identified persons will suffer from at least one cyberstalking incident in their lifetime.

The average incident of cyberstalking will last for two years and that average almost doubles if it involves people who used to be intimate with each other.

The most common form of cyberstalking is email, which 83% of victims stated that they received.

Statistics provided by NSAM Stalking Resource Center
