

Principles of Ecology

Across

- [4] Portion of earth that supports life
- [6] Area where an organism lives
- [7] Two species living together
- [10] Eats only plants
- [12] Living
- [13] Flow of energy
- [14] One organism consumes another
- [16] Eats both plants and animals
- [17] Eats only meat
- [19] Simple model that shows the flow of energy
- [20] Anything that takes up space and has mass

Down

- [1] Organisms and their environment are studied
- [2] Role an organism has
- [3] Chemical substance an organism needs to sustain life
- [5] Biological community and abiotic factors that affect it
- [8] Eats dead matter
- [9] Consumes other organisms
- [11] Non-living
- [15] Collects energy from the sun
- [18] Many food chains

Solution
