# **SNS COLLEGE OF TECHNOLOGY**

## (An Autonomous Institution)

### Match the Following

| 1. Anode  | $\rightarrow$ | Lithium Battery             |
|---|---------------|-----------------------------|
| 2. Cathode                                      | $\rightarrow$ | Secondary batteries         |
| 3. Electrolyte                                  | $\rightarrow$ | Primary batteries           |
| 4. Separator                                    | $\rightarrow$ | Allows ions to move between |
|   |               | anode and cathode           |
| 5. Irreversible chemical reaction $\rightarrow$ |               | КОН                         |
| 6. Reversible chemical reaction $\rightarrow$   |               | where reduction occurs      |
| 7. Alkaline battery                             | $\rightarrow$ | Motor cycle                 |
| 8. Lead Acid Battery                            | $\rightarrow$ | prevents short circuits     |
|   |               | between electrodes          |
| 9. Hearing aids                                 | $\rightarrow$ | where oxidation occurs      |
| 10. Laptops                                     | $\rightarrow$ | Zinc Air battery            |
|   |               |                             |

#### Fill in the Blanks

Type of battery which can be only used once\_\_\_\_\_

Type of battery which can be recharged\_\_\_\_\_

On charging secondary batteries, the reaction is \_\_\_\_\_

Thermal plants have more efficiency than fuel cell (True/False\_\_\_\_\_

Most commonly used battery in automobiles & inverters\_\_\_\_\_

Secondary cells are charged by passing current through it in the \_\_\_\_\_\_direction

Grid of lead packed with \_\_\_\_\_ as cathode in lead storage battery

Electrolyte used in lead storage batteries\_\_\_\_\_

Another name of dry cell\_\_\_\_\_

(LEAD OXIDE, REVERSED, LEAD ACID BATTERY, LECLANCHE, OPPOSITE, PRIMARY, SULPHURIC ACID, FALSE, SECONDARY)

### **True or False**

- 1. Fuel cells produce electricity by burning hydrogen (True or False)
- 2. The only byproduct of a hydrogen fuel cell is water (True or False)
- 3. Fuel cells are more efficient than internal combustion engines (True or False)
- 4. Fuel cells require a constant supply of fuel and oxygen to operate (True or False)
- 5. Fuel cells store energy like a battery (True or False)
- 6. Hydrogen is the only fuel that can be used in all fuel cells. (True or False)
- 7. Fuel cells can be used to power vehicles. (True or False)
